

PartnerPlast's HSE Policy

Working at PartnerPlast shall be safe and secure, with a working environment based on openness and trust. Health, safety and the environment shall all be integral elements in all our planning and activities.

Our goals:

- Create a safe and secure working environment without accidents, occupational injuries or damage to the environment.
- Prevent, or minimize the impact of our products and services.

All employees shall contribute to achieving these goals, and we also expect our suppliers and other collaborators to participate in this initiative.

We shall:

- Exercise best practice and set high HSE standards meeting relevant legal- as well as industry related HSE requirements.
- Manage HSE impact throughout the value chain to achieve continuous improvement in our products and services' lifecycle.
- Ensure all our employees have been trained in HSE.

PartnerPlast's Environmental Policy

PartnerPlast AS is committed to undertake continuous efforts in order to achieve environmental improvements.

We are committed to satisfy current rules and regulations, have a high competence and engagement to sustainability and environmental issues by focusing on:

- Circular economy and recycling of our own products
- Seek to improve product design to minimize environmental impact
- Identify environmental conditions affected by our efforts in the value chain
- Replace/reduce consumption of environmentally hazardous chemicals
- Improve/reduce energy consumption
- Improve upon the recycling rate

PartnerPlast AS has implemented an environmental management system in accordance with ISO 14001:2015, which is an integral part of the company's management system. The system ensures documentation of the company's own requirements and, as a minimum, compliance with applicable rules and regulations. This, to ensure all environmental requirements have been accounted for within all our processes.

All our employees are committed to working towards improving the effectiveness of the environmental management system.
